

*These are the survey questions (including any preamble) and detailed tables of a **National Post/DART Insight** poll created and analyzed exclusively for Postmedia in full consultation and under the direction of veteran pollster John Wright, CEO of **DART Insight**, a division of **DART Insight and Communications** Inc. The data was collected in partnership with Canada's national survey sample research provider **Maru/Blue** that curates a vast Online Panel and provides data collection services.*

All questions herein were placed carefully on the questionnaire and then randomized to ensure that there was no inter-item contamination.

*The survey was conducted on a total **split sample** of 5,769 randomly selected Canadian adults who are members of **Maru/Blue**'s Online panel between September 13-19, 2018. Respondents could opt in for either official language. The results have been weighted by education, age, gender, and region to match the population, according to Census data. This is to ensure the sample is representative of the entire adult population of Canada. The precision of this **DART Insight** Online poll is measured using a Bayesian Credibility Interval. In this case, a weighted **split sample size of 2,902/2,867** is accurate to +/- 2.1% 19 times out of 20, had all Canadian adults been polled. The credibility interval will be wider among subsets of the population and individual provinces. Minor discrepancies in the data may occur due to rounding.*

*Paired/Overlap T-Test for Means, Paired/Overlap Z-Test for Percentages
Uppercase letters indicate significance at the 95% level.*
